

Kanban: Odisee

Kanban boards are helpful for showing items in a database moving through stages of a process. They provide an easy way to stay on top of progress and keep tasks on track.

1. Every card on a Notion board is its own page, where you can add more content. Click into a card to see more.
2. Customize what's seen on a card by clicking **...** on the top right of the database and clicking Properties
3. Move cards along the work-in-progress limits with drag-and-drop.

↓ Click through the different database tabs to see other views.

Aa Name	Assign	Deadline	Select	Status	Team
</> <u>Implement MVC for Album</u>	 tibo van gindertaelen			Done	Engineering
</> <u>Implement Action for AlbumDetails</u>	 tibo van gindertaelen			Done	Engineering
</> <u>Implement Action for Index</u>	 tibo van gindertaelen			Done	Engineering
